

UNITED NATIONS
Office for Outer Space Affairs

7 July 2010

The United Nations Office for Outer Space Affairs (UN OOSA) is proud to support the Space Generation Advisory Council (SGAC) and the holding of its annual Space Generation Congress (SGC). Since its inception at the United Nations Third UN Conference on the Exploration and Peaceful Uses of Outer Space (UNISPACE III), SGAC has been an important voice of young people. Through its Permanent Observer status with the Committee on the Peaceful Uses of Outer Space (COPUOS), SGAC represents university students and young professionals from around the world.

In bringing together 100 of SGAC's members, SGC becomes a forum about the top space topics of our time for these future leaders. Together they can share their knowledge and intercultural experiences, learn about international cooperation in the Space Age, create solutions for the challenges of tomorrow, and gain skills to help them in their pursuit of space exploration. This year's five themes - Industry, Agency, Climate, Exploration, and Outreach - hope to enable this conference to be one of the most productive SGCs.

Given the vital role SGAC plays, the United Nations continues to be in strong support of the Space Generation Advisory Council.
